This dude is seriously clever and manages to make a book of fact facts that is not gimmicky at all. I thought I was going to sit down and browse through this before doing something that was actually related to furthering my own survival, but instead I wound up actually reading through most of the book in a book-like way. While there are a few contemporary references here and there,

the book will definitely be just as culturally reverent a few years from now while still being as enjoyably factually irrelevant and irreverent. I mean, I read through this and I can't believe how much he came up with and how effortless it seems. Buy the book for yourself, buy it for friends, follow Disalmanac on Twitter, and commit yourself to being the life-like life of the party. 0 of 0 people found the following review helpful. True Fact: This Is One Funny Book By Erik Bergman A society that runs on misinformation can't afford to run out. Scott Bateman, Disalmanacarian, has performed an essential public service by giving us a fresh crop of lies, damn lies and statistics, otherwise known as the fact-like facts in "Disalmanac." It will make you laugh out loud or at least cause you to giggle like a fiend while others wonder what's wrong with you. This book is the proper format for our short-and-shorter attention span. It honors our fascination with pop culture. It skewers our reliance on junk news from the web. I dare anyone to improve on this line: "The United States announced that its new Middle East policy is "The enemy of my Yemeni is my frenemy." My copy sits on my desk for when I need comic relief from the deadly serious adult facts I have to deal with at work. Buy the book, check @Disalmanac Twitter feed, feel better soon. 1 of 1 people found the following review helpful. A review-like review By Rikonius This book of fact like facts is very amusing. If you want to sort of know about diverse subjects while laughing then this book is for you. Also, if you're like me, and your first name is Richard, you can safely read it without the almanac stealing all your money, which is more than I can say for the one by that jerk Ben Franklin. So in conclusion, buy this book. And if you see Benny Franks around anywhere, tell him I'm coming after him.

Have you ever wanted to dazzle your friends with your command of history, science, and other important matters? No? Then this is the book for you. Ronald Reagan once famously said, Facts are stupid things. The book you hold in your hands will prove it. Did you know that Albuquerque's population is 78% chupacabra and 22% victim? Do you know why civilization started in Mesopotamia, and not Boise? And did you know the reason you shouldn't stare at the Sun is that it will probably shoot you and turn your skin into a rain poncho? Disalmanac is a handy compendium of false facts covering everything from world history and economics to pop culture, sports, and more. All of which are incorrect, but try not to be so judgy about it. But wait, there's more. You'll also discover a generous supply of Random Bonus Facts from the likes of Michael Ian Black, Neil Gaiman, Wil Wheaton, Weird Al Yankovic, and other luminaries who may or may not have a good grasp of the facts.
