Some jokes are more advanced than others, but you'll get the point. 0 of 0 people found the following review helpful. Just alright By Jacquelyn Johnson The humor is very specific so it may not appeal

to everyone. 2 of 2 people found the following review helpful. From one genius to another! By Sharon A CarzDee has a wonderful way of presenting potentially difficult concepts in a creative fun way - this goes for math as well as figure skating!

DO YOU GET THE POINT?" is a great book, in which the author, Dee Goldstein, definitely makes mathematics fun and enjoyable at ALL LEVELS! What could be better than laughing, thinking, and learning all at the same time??? By utilizing graphics, cartoons, and witty subtleties ... this entertaining, challenging, and uniquely humorous book captivates ALL AGES into a delightful and amusing world of mathematical thinking at its best ... all the way from simple arithmetic and algebra through more complicated and advanced graduate school theories!!! Each individual page independently challenges the reader to view mathematics from a totally humorous vantage point ... and each illustration captivates one into a delightful and amusing world of indisputable pleasure, laughter and all-encompassing entertainment! Challenge yourself with each and every illustration, cartoon, and graphic and have fun throughout your journey. There are explanations for every page of this book's humor, with detailed discussions and fully descriptive thought processes for each extremely special and individualized funny twist ... all this, as one explores every facet of the mathematical inquisitiveness of one's mind. This unique humor offers many enjoyable and mind-expanding hours of pure fun for the math enthusiast, as well as affording many smiles and lots of chuckles for even the casual fan of mathematics, shapes, and numbers!!! Have fun stimulating your mind with each exciting page while satisfying your desire for total enjoyment and smiling with delight at all these entertaining illustrations of MATHEMATICAL CLEVERNESS!!! If you like mathematics if you know someone who likes mathematics or if you would like to encourage a specific someone to enjoy mathematics more then THIS BOOK IS PERFECT! ENJOY!!!

About the AuthorThe author, Dee Goldstein, wants to make sure that everyone at all skill levels of mathematics, and at all age levels realizes that Mathematics Can Be Fun and Enjoyable especially when viewed through her clever, witty, and mind-expanding perspective! In Dees book, DO YOU GET THE POINT?, she provides a unique weaving of laugh-out-loud humor with innovative mathematical concepts to awaken ones inquisitiveness for readers with many varying degrees of mathematical mastery. The author delights in rekindling ones knowledge of many dormant facts by using entertaining cartoons and graphics all with mathematical overtones. One of Dees ultimate goals of this book is to guide the reader toward finding fun in mathematics by having them realize how much they already do know, and by providing a separate and complete section of this book that affords full and detailed explanations for each entertaining illustration thus bringing enjoyment and pleasure to all who partake. Dee has always been involved in the field of teaching and realizes the true value of having pleasant and positive experiences. She has not only taught all levels of mathematics from basic arithmetic through algebra, geometry, trigonometry, calculus, differential equations, logic, and algebraic topology Dee also leads another life where she has coached and trained many high-level National and International Competitive Ice Skaters. Here, she has also produced and choreographed many full length shows designed to successfully entertain vast audiences of all ages and diversified interests. In DO YOU GET THE POINT?, Dee combines her many distinctive talents to engage and enlighten everyone as to the captivating humor deeply rooted in so many mathematical concepts. This book is a perfect addition to everyones library that enjoys a unique experience in mathematics, where the main objective focuses on smiles and laughter all with lots of cleverness reigning at the forefront. This book is a great gift for anyone involved in this field or any peripheral field or for anyone that wishes to merely delight in the joys of Dees unique humor and imagination. This book is a must for many enjoyable and challenging hours of fun and amusement.
