EinhornThis builds on the solid foundation of Mike Lawrence's classic "How to Read Your Opponents Cards". It covers more advanced topics such as:- why did the opponents give you an option they didn't have to? Was it a mistake, or a trick to give you a losing choice- clues from discards. Why did East discard hearts when you have AKJ9 in Dummy in a 3NT contract? Probably because it's safe and he has 5+.- clues from partner's actions - why did partner behave in such a way? How can I help out partner on defense.- why is declarer not attacking Spades in Dummy with a holding of KQJ95? Because he has the ace. There is one clear mistake, and some of the signaling methods are not used in the USA. Also some of the bidding is obsolete. Still, it's an excellent book, and a must read. 0 of 0 people found the following review helpful.
