**Ken Loach : Loach on Loach (Directors on Directors)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Loach on Loach (Directors on Directors):

An exploration of Ken Loach's cinema of social conscience. One of Britain's most distinguished and respected

filmmakers, he makes tough, uncompromising films about a beleaguered working class -- but with poetry and humor. Honored by every major British and European award for his films of the nineties (*Ladybird, Ladybird*; *Land and Freedom*; *Raining Stones*; *Riff-Raff*; *The Flickering Flame* and *Carla's Song*), Loach initially changed the face of British politics in the 1960's with a devastating television series on the homeless. Most recently he has stirred furious debate among the Spanish with *Land and Freedom*, his 1995 film on the Spanish Civil War.
