Alister McFool : McFool's Internet Humor before purchasing it in order to gauge whether or not it would be worth my time, and all praised McFool's Internet Humor:

0 of 0 people found the following review helpful. What do people find funny? By Shasta The internet has been a great source for humor. If you are like me, then you probably find it tedious to find good jokes. For every good one, you must wade through 10 mediocre to downright disgusting jokes/stories/humor. McFool has obviously waded through the swamp and picked out what he felt was the best. The humor is at a consistently high level and the book is arranged in a sensible manner. Each joke/story is rated either R, PG or G (no "X" jokes) so that presumably kids can

immediately go to the R jokes. The book is really written by thousands, as everyone has a chance to post their humor, and if it is good, it will spread like wildfire through the thousands of humor websites and end up in a book like this. It is interesting to see what people find funny now. A lot of the humor is about male/female relationships, the male character, human stupidity and modern life. Nice light reading that will really make you laugh.

Written by thousands, compiled by Alister McFool, the book distills the best of the thousands of cyber jokes and stories, giving readers a glimpse of themselves through humor. The internet is the best thing to happen to humor since the corner bar, and this book is the best thing to happen to internet humor since the first computer geek pecked out some lame-o bit and sent it to some other geek friend.
