Daniel Fabrizio, Jim Cee : Sports Investing: College Football Betting Systems before purchasing it in order to gage whether or not it would be worth my time, and all praised Sports Investing: College Football Betting Systems:

3 of 4 people found the following review helpful. 40 Pages @ \$40 RetailBy FO Music LoverThe Title of this review equals \$1 per page. Now when the content is double spaced - it is now \$2 per page (20 pages @ \$40). Many pages are not even full pages - so, to be nice, I'll make the book 15 pages - now \$2.67 per page. Now maybe the systems in this book makes up for the \$40 (\$36 on), but I'll never know - I returned the book. If there were close to 40 pages of content, I probably would have kept the book to try out the systems.5 of 7 people found the following review helpful.

Contrarian Betting Systems for College Football By Fun and Games I enjoyed Fabrizio's first book, "Sports Investing: Profiting from Point Spreads" - which gives a good overview of applying contrarian methods to the sports betting world. The first book is fairly general but does a good job of helping readers apply systematic methods. In particular, the author advocates objective approaches that make sense, such as: "betting percentages" (to find value and bet against the general public) and "line movement setups" (that indicate the direction of syndicate/big bettors). http://www..com/Sports-Investing-Profiting-Spreads-Marketplace/dp/160970004X/ref=sr_1_1?ie=UTF8&s=booksqid=1283008305sr=8-1

This follow-up book on "College Football Betting Systems," is fairly thin, but it takes the first book a step further. It focuses on college football data - and in particular, shows parameters such as specific point spreads and betting percentages ranges that have helped the author and his team achieve decent results. Sports bettors looking for a get-rich-quick method will be disappointed. However, those looking for a solid approach that can be used both "stand-alone" -- or as part of additional handicapping methods -- will find a lot of useful and practical betting info. Dan Fab and his team have put themselves out there with published data, methods, and picks for years -- and have produced generally profitable results, even after vig. 4 of 5 people found the following review helpful. Sports Investing College Football Betting Systems By mrpollack Total rip-off. Do not buy this 'book'. It has 40 pages - if you count the blank pages and the pictures. The authors (it took two of them) must have invested all of ten minutes to produce this. I was duped, don't let this happen to you.

This is a follow-up to the popular first book in the series, "Sports Investing: Profiting from Point Spreads," which remains a top-selling book in its sports gambling category. This book focuses on specific college football betting systems and strategies. The book remains true to the philosophy of contrarian value in sports investing. In particular, the authors reveal betting systems and parameters that they have used to successfully navigate the college football sports marketplace.

About the Author Daniel Fabrizio is the president and founder of SportsInsights.com, a leader in the sports information industry. Dan has more than 10 years of experience in the sports marketplace industry as a risk manager for online sportsbooks, and is the innovator behind SportsInsights' successful contrarian approaches.
