His love of science and math and his experience sharing these with his family have resulted in Kenneth's move into the literary world. Kenneth has also created a series of books on sudoku. With the ability to produce everything from reasonably small and quite simple puzzles, which the younger children can enjoy, to large and fiendishly difficult puzzles, which challenge even the most experienced and ardent puzzle solvers, sudoku puzzles are great fun. He has also produced books on word search puzzles, his additional

foray into mixing entertainment with learning. Kenneth outlines his concept of using puzzles as education in his Introduction: With no fewer than 40 sets of almost identical pictures in full color, this Spot The Difference book provides hours of fun for kids of all ages. It is however best suited to kids over the age of 6. Each set of pictures contains 10 differences, and finding them helps your child to develop a range of skills including observation, attention and concentration, as well as providing an excellent way to improve the memory. Unlike the print version of this book, you cannot mark the differences as you find them, and this is particularly useful when it comes to developing the visual memory. This also raises an important point. This is not a game or an app. designed for interactivity, but is a book created to help develop a range of skills, while also providing a great deal of fun at the same time. So, move away from the game boxes and tablets and cell phones and enter the fun and investigation of Kenneths SPOT THE DIFFERENCE PUZZLES. With forty sets of two part pages the differences between the pictures is subtle a fine challenge for the discerning eye. Fortunately turning the page shows the differences circled. This is a key to making the puzzles challenging but also rewarding to the child who has found all the differences and can check the results of comparison simply by turning the page. This is a fun puzzle set with very fine illustrations guaranteed to entertain children age 6 and up for hours. Grady Harp, December 16 of 0 people found the following review helpful. Very disappointing because young kids do like color photos By R. Francois I haven't taken this to my grand kids yet, but I already know that the color photos on the front are deceiving as the book is in black and white. You can get pages on color on line. Very disappointing because young kids do like color photos. I will try this out with them soon and let you know what they thought. Good teaching too for "same and different". 0 of 0 people found the following review helpful. Color By C. George The pictures need to be in color.

Spot the difference puzzle books are some of the most popular search and find books for kids and, like many childrens games and puzzles books, are excellent for child development. With no fewer than 40 sets of almost identical pictures, this find the difference book provides hours of fun for kids of all ages. It is however best suited to kids over the age of 6. Each set of pictures contains at least 10 differences, and finding them helps your child to develop a range of skills including observation, attention and concentration, as well as providing an excellent way to improve the memory. Like many kids activity books, these brain or mind puzzles make very popular childrens books, aiding both child development and education. Please note that the pictures in this book are in black and white, and that the differences between the pictures in each set are not dependent on color. However, if you would like to try these puzzles in full color, then why not pick up the Kindle edition of the book. As long as you have purchased this print version of the book through Amazon, you can buy the Kindle version free of charge.
