This sheet music was much to simple for my kids ...By NikiThis sheet music was much to simple for my kids, who actually wanted more complete arrangements. That was my fault, though, for not understanding how difficulty is graded for this type of book; they're teens with years of lessons and practice behind them. The music was perfect for elementary kids who are intermediate level. It's a great confidence booster; the score is recognizable even with pretty rudimentary sight-reading skills, so it is a fast learn for kids who do

best with a combo of sight reading and demonstration.9 of 10 people found the following review helpful. Love it! Please, publish more of them!!By A. FortThis review may hold true for all the "Big Note Piano" songbooks put out by Alfred Publishing as we've loved them all. It's perfect for my Late Beginner students and my 10-yr. old son who transports himself to another world when playing these arrangements. It's challenging enough as it offers lots of practice with different hand positions, keys, accidentals, eighth notes, meter, chords and intervals (just about every aspect of music). But simple enough that the pianist doesn't get frustrated. At the same time, it's mostly familiar music of favorite movies and songs, which offers motivation for the pianist. Even as an accomplished pianist and teacher, I LOVE playing from them!Alfred Publishing needs to put out MORE "Big Note Piano" songbooks for kids!!! We currently also own "Harry Potter: Magical Music from the First Five Years" and "The Polar Express". Would love to see "How to Train Your Dragon" and "Tangled" (along with more recent Disney hits), as well as more recent cartoon theme songs.0 of 0 people found the following review helpful. Some were easy to playBy SkyDragonMCHad many iconic songs. Some were easy to play. Others were hard. Not for the people who are just starting out. But, great for advanced beginners and intermediate piano players.
