**Gary W. Priester, Gene Levine : Startling Stereograms** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Startling Stereograms:

0 of 0 people found the following review helpful. Fun, while improving vision--Eye candy at it's best. By DC Customer Tried to get some more of these for Christmas last year and there was too long of a delay. Almost a year later--So glad I remembered to get an early start, by ordering 2 more of these, in Aug. These make for excellent gifts, for an older child, all the way to an older adult. They are fun and don't take as long as some to be spotted. Gary Priester is wonderful at making stereograms. I don't think I will ever tire of stereograms; they are just too dang fun and interesting, with an element of surprise. 4 of 4 people found the following review helpful. Beautiful By Lyr Very beautiful images, although the cover image is really the best one it's got, in my opinion. Also, high-quality paper and printing. 3 of 3 people found the following review helpful. My loved one is locked up in a jail By Janet My loved one is locked up in a jail. He requested stereograms to settle his fast running mind. They are wonderful for his spirit too.

There's something really magical about a stereogram; in fact, these stunning designs practically come alive with movement. As they tease and surprise our brains, they teach us to look at things differently and make us aware of how our eyes play tricks on us. And, of course, they are simply beautiful to see. Through the power of illusion and the illustrators skill, meaningless patterns and hidden objects on a 2-D page take shape and pop out in full, glorious, clearly defined 3-D. Images that were flat gain amazing dimension. These incredible, colorful, artistic creations offer unbelievable motion and depth.

About the Author Gene Levine was raised in a family of artists. When he saw his first stereogram, he realized the artistic potential and quickly taught himself to create the images. Levine began colorstereo.com as an online gallery

and was soon supplying most of the stereogram art for what would become the very successful TJ Mook series in Japan. He has been published in books and magazines all over the world, along with stereogram advertising and promotional applications. No one has done more to elevate the stereogram as an art form. Levine lives in Los Angeles, California. Gary Priester graduated from Art Center College of Design in Los Angeles. He spent fifteen years as an art director and later ran a very successful graphics design firm. Priester discovered stereograms in the 1990s and remains as obsessed with the form today as he was then. He has created hundreds of stereograms over the years for a popular Japanese book series, and designs and makes custom versions for advertising and sales promotion. Priester and his wife live in Placitas, New Mexico.
