These have her using all her skills and strategies, are supposedly wicked hard, and way beyond my skills.0 of 0 people found the following review helpful. As advertised!By AJ the GI bought this Sudoku book for a friend of mine who is rarely

challenged by Sudoku books. I was hopeful that the book would live up to the hype ("Nearly Impossible Puzzles"), but I was cautious, as I have been misled before. My friend received the book for her birthday and started at the middle of the book to see how hard it was going to be. She was pleasantly surprised to find the puzzles challenging and was immediately hooked! I recommend the book to those who like a challenge and are Sudoku experts.
